Investment highlights
Investment highlights: Why invest in Cargotec?

1. Technology leader and strong market positions, leading brands in markets with long term growth potential
2. Transforming from equipment provider into the leader in intelligent cargo handling
3. Growing services business and asset light business model are decreasing the impact of cyclicality
4. Capitalizing global opportunities for future automation and software growth
5. On track for profitability improvement and to reach financial targets
## 1. Technology leader and strong market positions

<table>
<thead>
<tr>
<th></th>
<th>Kalmar</th>
<th>Hiab</th>
<th>MacGregor</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>End markets</strong></td>
<td>Ports, terminals, distribution centers</td>
<td>Construction, distribution, forestry, defence, waste and recycling</td>
<td>Maritime transportation and offshore industries</td>
</tr>
<tr>
<td><strong>Market position</strong></td>
<td>1-2#</td>
<td>1-2#</td>
<td>1-2#</td>
</tr>
<tr>
<td><strong>Key drivers and supporting megatrends</strong></td>
<td>Global trade growth driven by globalisation and growing middle class</td>
<td>Construction growth via population growth and urbanisation</td>
<td>Global trade growth driven by globalisation and growing middle class, oil price</td>
</tr>
<tr>
<td></td>
<td>Container throughput growth, larger ships require investments in ports, ports need to increase efficiency via automation, increasing importance for safety</td>
<td>Changing distribution patterns and models</td>
<td>Increasing penetration in developing countries</td>
</tr>
<tr>
<td><strong>Competitive advantage</strong></td>
<td>Recognized premium brand Leading market position in software Full automation solution offering (equipment, software and automation, service) Asset light business model</td>
<td>Hiab one of the two global players with scale Diversified product range Asset light model, efficient assembly operation</td>
<td>Asset light model, technology leader, closeness to customers (shipyards and shipowners) globally, industry competence</td>
</tr>
</tbody>
</table>
2. Transforming from equipment provider into a leader in intelligent cargo handling

2013
Product leadership
Good equipment company
→ Product R&D drives offering development and higher gross profit

2018
Service leadership
World-class service offering
→ Connected equipment and data analytics building value on data
→ Significant software business

2020
Leader in intelligent cargo handling
40% of the sales from services and software
→ More efficient and optimised cargo handling solutions

Must-wins

World class service offering  Lead digitalisation  Build word class leadership
3. Growing services business and asset light business model are decreasing the impact of cyclicality

Asset light business model with a flexible cost structure
- Kalmar and Hiab: efficient assembly operation
- MacGregor: efficient project management and engineering office: > 90% of manufacturing and 30% of design and engineering capacity outsourced
- No in-house component manufacturing

Leading product portfolio creates solid platform for services development
- Growing services will bring stability, better profitability and decrease cyclicality

Large installed base – attractive potential

Actions to increase capture rates of spare parts:
- Improve sales process
- Digitalization efforts and connectivity: online services and e-commerce solutions
- Distribution centers improving availability
Industry trends support growth in port automation:
- Ships are becoming bigger and the peak loads have become an issue
- Safety in the terminal yard has become even more of a focus for operators
- Customers require decreasing energy usage and zero emission ports
- Optimum efficiency, space utilization and reduction of costs are increasingly important
- Shortage and cost of trained and skilled labour pushes terminals to automation

Significant possibility in port software:
- Container value chain is very inefficient: total value of waste and inefficiency estimated at ~EUR 17bn
- Container shipping industry has an annual IT software spend of approx. EUR 1.7 billion. The market is expected to grow to EUR 2.8 billion by 2020
- > 50% of port software market is in-house, in long term internal solutions not competitive
- Navis has leading position in port ERP
- 500 software engineers

Automation creates significant cost savings*

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Labour costs</td>
<td>60% less labour costs</td>
</tr>
<tr>
<td>Total costs</td>
<td>24% less costs</td>
</tr>
<tr>
<td>Profit increase</td>
<td>125%</td>
</tr>
</tbody>
</table>

* Change when manual terminal converted into an automated operation
5. Clear plan for profitability improvement and to reach financial targets

**Growth**
- Target to grow faster than market
  - Megatrends and strong market position supporting organic growth
  - M&A potential

**Profitability**
- Target 10% EBIT for each business area and 15% ROCE on Group level over the cycle

  Cost savings actions:
  - 2017 EUR 25 million (MacGregor)
  - 2017 Interschalt EUR 2 million
  - 2018 EUR 13 million (Lidhult assembly transfer in Kalmar)
  - 2020 EUR 50 million (indirect purchasing and new Business Services operations)

- Product re-design and improved project management
- Higher operating profit key driver for higher ROCE

**Balance sheet and dividend**
- Target gearing < 50% and dividend 30-50% of EPS
  - Strong cash flow
  - Gearing below target, enables solid dividend payout

**Sales and operating profit development**

*excluding restructuring costs*
Container throughput still forecasted to grow year on year

Growth from 2012 to 2020 25%
CAGR 2.8 %

Flexible and scalable Navis TOS software
Kalmar’s operating environment

**Kalmar**
Provides integrated port automation solutions including software, services and a wide range of cargo handling equipment.

**Navis**
TOS coordinates and optimises the planning and management of container and equipment moves in complex business environments. Navis provides also maritime shipping solutions:
- Stowage planning
- Vessel monitoring
- Loading computer
- Route planning

**Xvela**
The collaboration platform serving the needs of ocean carriers, terminals and their shipping partners.

**Bromma**
Industry leading spreader manufacturer.

Oxford Economics: Industry output forecast
10/2016

May 2017
Hiab’s key growth drivers

Cranes
Gain market share in big loader cranes and crane core markets

Tail lifts
Enter fast growing emerging markets and standardise and globalise business model

Truck-mounted forklifts
Accelerate penetration in North America and Europe

Services
Increase spare parts capture rates driven by connectivity and e-commerce
MacGregor
MacGregor has strong positions in both the marine and offshore market

Marine
~3/4 of sales

Offshore
~1/4 of sales

- Container lashing #1
- Hatch covers #1-2
- Cranes and selfunloaders #1
- Container vessel (RoRo) #1

- Offshore advanced load handling #1
- Offshore winches #2
- Mooring systems #1
- Loading and offloading systems #1
Merchant shipping and offshore markets may have reached the bottom in orders

**Long term contracting 2012-2026**
Merchant ships > 2,000 gt (excl ofs and misc)

**Long term contracting 2014-2023**

MacGregor’s asset-light business model gives flexibility

Cost-efficient scaling

90% of manufacturing outsourced
30% of design and engineering capacity outsourced
Financials
Cargotec’s Q1 2017 interim report
Highlights of Q1 2017 – Strong start for 2017 in Hiab

Cargotec’s operating profit* margin improved
- Kalmar’s profitability improved
- Record high operating profit margin in Hiab
- Lower sales led to decline in EBIT in MacGregor

Orders received and net sales grew in Hiab, were in previous year’s level in Kalmar and declined in MacGregor

Service and software sales 32% of total sales at EUR 250 (239) million

*) Excluding restructuring costs
Gross profit margin improvement continued

- Q1/16: 23.8%
- Q2/16: 24.8%
- Q3/16: 23.1%
- Q4/16: 23.8%
- Q1/17: 25.8%

**Total number of shareholders: 20,847**

Wipunen varainhallinta Oy is a company controlled by Ilkka Herlin, Mariatorp Oy a company controlled by Niklas Herlin and Pivosto Oy a company controlled by Ilona Herlin.
Market environment in Q1 2017

Number of containers handled at ports grew
- Growth continued in Q1/2017
- Strong interest for efficiency improving automation solutions
- Customers’ decision making is slow

Construction activity on good level
- Good development continued in the US
- Construction market growing in Europe

Marine cargo handling equipment market still weak
- Market improved in Q1/2017 in both merchant and offshore sector, but orders remained well below historical levels

Global container throughput (MTEU) – Key driver for Kalmar
- 

Construction output – Key driver for Hiab

United States
- 

Europe
- 

Long term contracting – Key driver for MacGregor

Merchant ships > 2,000 gt
- 

Mobile offshore units

From turnaround to leader in intelligent cargo handling with sector leading profitability

Turnaround is delivering results in Hiab and Kalmar; MacGregor has improvement plan in place

Transformation has started from equipment business to world class services offering and leadership in intelligent cargo handling

Investing to ensure a leading position

Shaping the portfolio to increase shareholder value

Target:

→ 10%

Operating profit margin (EBIT) in each business area over the cycle
Well positioned to become the leader in intelligent cargo handling

- Execution capabilities in place and profitability improving
- Building on tremendous strengths
- Transforming from equipment company to a company that will shape the cargo handling industry
- Investing to ensure a leading position
- Shaping our portfolio to drive growth and shareholder value
Operating profit excl. restructuring costs development

Sustainability
Sustainability is a great business opportunity

We serve an industry, which produces the majority of emissions as well as GDP in the world
- Inefficient industry with potential to improve

Our vision to be the leader in intelligent cargo handling also drives sustainability
- Increasing efficiency and life-time solutions

We are in a position to be the global frontrunner, setting the sustainability standards for the whole industry
- We are ready to shape the industry to one that is more sustainable
Sea Freight Transport is by far the most sustainable transport mode in terms of emissions

Compared to transportation of goods

→ by trains, sea freight emits ~2-3 times less emissions
→ by trucks, sea freight emits ~3-4 times less emissions
→ by air cargo, sea freight emits ~14 times less emissions
Offering for eco-efficiency:
~20% of 2016 revenue with huge potential to improve

**Systems efficiency**
Visibility to identify inefficient use of resources and fuel
Software and design system

**Emission efficiency**
Technology to enable fuel and emission efficient offering
Products with features to decrease fuel usage and avoidance of maritime hydraulic oil emissions

**Efficiency for environmental industries**
Offering to support the operations in environmental industries
Cargotec solutions for environmental industries

**Resource efficiency**
Service enabling the extended usage of products or new applications
Product conversions and modernizations
Cargotec will set the industry standard for sustainability

- Cargotec is a supporter of UN Global Compact and other major international sustainability initiatives
- We set the industrial standard in compliant and transparent operations
- We have a clear governance on sustainability issues with Board overview on the subject
- Safety is our key priority and we have clear improvement program to further decrease our current IIFR rate of 5.76
- Certification coverage of production sites:
  - ISO14001 92%
  - OHSAS18001 80%
  - ISO9001 94%

Investor presentation

May 2017

69
DS Research: 298 Mteu new capacity to be added 2016-2021 which could trigger US$bn 37 investments for container handling equipment

According to DS Research, the project pipeline of all upcoming container terminal projects consists of 405 TEUm additional capacity scheduled for completion until 2021. 298 TEUm new capacity is expected to be finally executed until 2021, assuming that further project postponements are required to adjust to the weakening demand. This would trigger roughly US$bn 146 investment.

Depending on the type of project, different cost have been assumed for quay construction, container handling equipment, yard construction, dredging & land reclamation and other cost. Overall, DS Research has estimated that investments for container terminal projects 2016-'21 include about US$bn 37 for container handling equipment.
Ship sizes increasing dramatically

- The largest containership in the fleet has nearly tripled since 2000
- The average size of new builds doubles between 2009 and 2014

Hiab’s investments for profitable growth

E2E value chain – optimise our distribution network and supply chain

Product innovation – strengthening our market positions

Digitalisation – all new products connected by 2018

Services – further expand our offering
Merchant ships: Contracting forecast by shiptype (number of ships)
Merchant ship types > 2000 gt, base case

Source: Clarksons March 2017
Deliveries 2017 and onwards decrease due to the extremely low contracting levels 2015-2016, and will remain at historically lower levels due to the continued lower contracting in no of ships.

Merchant ships: Deliveries forecast by shiptype (number of ships)
Merchant ship types > 2000 gt, base case

Deliveries 2017 and onwards decrease due to the extremely low contracting levels 2015-2016, and will remain at historically lower levels due to the continued lower contracting in no of ships.
In the base case forecasting scenario, offshore CAPEX is projected to gradually recover from 2018 onwards, reaching pre-downturn levels in 2021 and staying relatively stable thereafter at around $120-150bn per annum.
Offshore mobile units: Contracting forecast by shiptype (number of units)

Offshore mobile units, base case (USD 60/bbl 2021)

Shipbuilding – Contracting (ships >2000 gt/dwt)

Estimated newbuilding investment $bn

Source: Clarksons April 2017
Since peak shipyard output in 2010 (in CGT terms), it is estimated that the global shipbuilding capacity has declined 30%.

The contracting forecast suggests that there will be further pressure on yards, and the capacity is projected to decline by another 20% by end of 2019.
