Market environment in January-June

- Despite the slower container throughput growth, the market for container handling equipment and for port automation solutions was active.

- Strong construction activity continued in the US, supporting demand for load handling equipment. In Europe, activity levels still varied between countries. Demand for services was healthy.

- Market for marine cargo handling equipment remained weak. Demand for marine cargo handling equipment for RoRo and special vessels was healthy. Demand for offshore load handling solutions was low. Demand for services was satisfactory.

MacGregor supplies highly-specialised winches for a pilot project to generate electricity from waves.
